

Vintage travel trailers like this Airstream shown by owner Tina Lambert, above, of St. Thomas, Ontario, is a new feature at Cars 'R' Stars.

Cars 'R' Stars to Feature 'Airstream' RVs

The historic Packard Proving Grounds in Shelby Township will be the setting for the return of Cars 'R' Stars @ PPG (at the Packard Proving Grounds) on Sunday, June 9, from 8 a.m. to 3 p.m.

The anticipated event, which according to organizers is one of the oldest car shows in Michigan, this year will include a unique special feature, the "Tin Can Tourists," or vintage travel trailers and motor coaches throughout time, and including the hallmark aluminum constructed Airstreams produced in the 1950s and 1960s.

"The famous original Airstream motor homes that set Americans off on their across-the-country vacations are a truly appealing part of the history of the American road. This is a great opportunity to see those imaginative original vehicles from inside out," said Don Sommer, Cars 'R' Stars @ PPG board member, and founder of the Meadow Brook Concours d'Elégance.

Preferred car club and class parking will be available for all pre-registered cars. The pre-registration fee is just \$15 for non-judged cars and \$20 for judged cars.

"This is a wonderful venue for car clubs," said Sommer. "By registering early, they get savings and are assured of a great location to show off their cars as a group, with their club friends." Registration the day of the show is \$20 for non-judged and \$25 for judged cars.

"Cars 'R' Stars @ PPG is known for welcoming all examples of collectible transportation and this year's feature is a good example of that," Sommer said. "Our field also includes everything from two-wheeled to four-wheeled, brass era and pre-war, post-war, hot rods, muscle cars,

trucks, racers, custom, commercial and military."

Organizers of the Cars 'R' Stars @ PPG automotive show and celebration are a collaboration of the Detroit Chapter of the Veteran Motor Car Club of America, Motor City Packards and the Packard Motor Car Foundation. The new organizers are offering a variety of activities, including:

- The Car Show featuring new in-place Concours judging;
- A swap meet with indoor and outdoor areas and more than 200 vendors, as well as a special arts and crafts area;
- A car corral with a large selection of cars for sale;
- Class and club awards;
- Custom collectible trophies;
- Shuttles for the handicapped;
- Nitsche's hotdogs, sausages, hamburgers and more; and Masstro's hand-dipped Stroh's ice cream;
- Music by DJ Jammin' Jerry.

As part of admission, members of the public will have an oppor-

tunity to tour the 83-year-old Packard Gate Lodge, designed by Albert Kahn, and currently under restoration by the Packard Motor Car Foundation as both a Michigan and national historic site.

"It's really a great day and the crowds are growing every year. They love to see the vehicles and tour the grounds, the lodge and the dormitory," said Linda Ashley, public relations spokesperson for the event.

Admission is available for a modest cost at the entry. Children under 12 attend free. For more information or to register, visit the event website at www.carsrstars.com.

GM's China Operations Earn High Ratings for Environmental Designs

The GM China Advanced Technical Center (ATC) in Shanghai has been awarded Silver Certification by the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) program.

The LEED certification program is a globally recognized process that uses common standards to define "green buildings." Its goal is to support the design and construction of buildings that reduce or eliminate their impact on the environment and promote sustainable design and construction practices.

The ATC includes research and development, advanced design, vehicle engineering, powertrain engineering and telematics laboratories. The first phase opened in September 2011 and the second phase in November 2012.

The ATC has adopted a series of green building best practices and technologies. They include:

design to reduce light pollution Paving and roofing materials to reduce the heat island effect;

- Water use design to save up to 30 percent of water used;
- Optimizing energy usage with energy-efficient strategies for glazing, lighting and HVAC with enhanced refrigerant material usage;

- Use of recycled and regional material content for construction and increased building air ventilation;
- Use of low-emitting materials such as adhesives, sealants, paints, coatings, and carpets and indoor pollution control.

"As China's most advanced automotive technical development center, the ATC has an opportunity to lead the way in protecting the environment," said Bob Socia, GM China president and Chief Country Operations officer for China, India and ASEAN.
